*World Air Waves a division of Visual Link Internet LLC provided a secure wireless network for RNC event in New York City.*

PR9.NET September 05, 2004 - World Air Waves Winchester Virginia [www.worldairwaves.com](http://www.worldairwaves.com) World Air Waves a division of Visual Link Internet LLC today announces that World Air Waves working with [newsstreams.net](http://newsstreams.net) has installed a secure wireless network that will be used by NYC Police to provide live testing of a new advanced wireless mobile video police security system at Madison Square Gardens during the RNC convention. This system will allow Police equipped with wearable computer systems to transmit broadcast quality video from each of the police or security personal equipped with the Equipment as they freely move about the RNC event. This will allow the commanders the ability to actually see what the officer or security personal are seeing. This gives a greater remote command and control capability over current systems relaying on voice only descriptions. This system also has the capability to provide secure two-way voice and data information as well. World Air Waves is a division of Visual link internet LLC. Specializing on secure innovative wireless microwave solutions based in Winchester VA.
