Gennux is pleased to announce that they have formed an exclusive Partnership Agreement with The Information Technology Training & Development Centre of Vocational Training Council (ITTDC/VTC) for the People, Government, Service Providers and Businesses within Hong Kong and Macau.

PR9.NET September 13, 2004 - Gennux is pleased to announce that they have formed an exclusive Partnership Agreement with The Information Technology Training & Development Centre of Vocational Training Council (ITTDC/VTC) for distribution and support of our eW@LL Anti-Spam Solution and Services. ITTDC/VTC will distribute and support the Gennux eW@LL anti-Spam solution for the People, Government, Service Providers and Businesses within Hong Kong and Macau.

This partnership between Gennux and ITTDC/VTC presents a unique opportunity for the businesses and the general public in Hong Kong and Macau to take affirmative action in response to the global threat of Unwanted Messages sent to email addresses, Personal Digital Assistants (PDA's), and Mobile Phones.

Through the use of the RecipientKey™ within eW@LL's Sender Confirmation Engine, the Gennux eW@LL anti-Spam Solution enables users to control what they want to receive. It creates a Personal Email Demilitarized Zone (PEDMZ) to protect each individual user from receiving unwanted messages. The eW@LL Solution is designed to protect the messaging infrastructure not only from unwanted messages but messages sent with malicious intent from the Stealth Sender.

Information Technology Training & Development Centre of Vocational Training Council's decision to embrace the eW@LL Solution was based not only on eW@LL's ability to provide protection for all Global Languages within all Messaging Environments but also due to its unique ability to effectively control unwanted messaging yet still support privacy and ethical policies.

"I am pleased to have Information Technology Training & Development Centre of Vocational Training Council join us in this mission. We now have not only a means for bringing the eW@LL Solution to the People of Hong Kong but also a training facility for eW@LL in Asia."

Terry Shaban, General Manager for Gennux Microsystems Corp.

###

About About ITTDC/VTC

ITTDC is one of the Vocational Training Council's major training and development centers. The advisors and training officers came from various industries with strong technical experiences. They provide high quality and market driven IT training, products and services to assist their customers to achieve better personal and business results.

About Gennux Microsystems Corp.

Founded in Canada, Gennux, produced and released the eW@LL Solution in response to the demand for a Globally Acceptable set of tools to manage Unwanted Electronic Messages (Spam) for Governments, Telecommunications Service Providers, ISPs, ASP's business and the public. Gennux's vision and mission is to eliminate this menace to our electronic society with the deployment of the eW@LL solution. To date, the success of this objective has surpassed all business forecasts. Our Customers and Partner Companies will soon be present in every city in every country of the world.
