Gennux is pleased to announce that ComSpire Technologies Limited has joined the growing number of eW@LL e-Messaging Protection Solution providers devoted to putting an end to Unwanted Electronic Messaging which is now threatening the Global Messaging Infrastructure.

PR9.NET September 30, 2004 - ComSpire Technologies Limited is devoting the Companies full attention to introducing the eW@LL Solution to their customers in China, Taiwan, Japan, Korea, Singapore, Malaysia, Australia and New Zealand.

ComSpire's efforts will be focused on the areas which are at the greatest risk of revenue losses due to Unwanted Electronic Messaging (Spam) such as Telecommunication Service Providers, Internet Service Providers, Public and Private Agencies and the End Users. They will be requesting assistance from all who are capable of contributing to their mission as well as those in neighboring Countries.

"With the recent joining of ComSpire to the group of companies and agencies dedicated to the eradication of Unwanted Electronic Messaging, the eW@LL Solution is being better positioned to response to this Global threat. By year end 2005 eW@LL will be globally accessible to all e-Messaging users for the protection of email, Personal Digital Assistants (PDA's), and Mobile/Cell Phones in all languages in every Country in all Cities.

Each day we are closing in on having eW@LL representation everywhere in the World. Our teams are working around the clock reviewing applications and drafting agreements for those companies which meet the requirements such as ComSpire has.

ComSpire was successful in becoming an eW@LL Solution representative because of their years of expertise in the Telecommunications industry. Their reputation as an honorable and progressive organization was the cornerstone for the partnership. The values and ethics of ComSpire and Gennux are so similar that one would be left with the impression that we are one entity. I am therefore delighted to have the ComSpire team join with us and all of our in place Partners, in our mission to eradicate Unwanted Electronic Messaging from the Global Messaging infrastructure."

###
