IMVITE Inc. is pleased to announce the launch of the IMVITE messenger - now available for download worldwide. IMVITE messenger is the newest and most exciting Instant Messaging platform available on the market. A unique platform with incomparable and attractive features, IMVITE is expected to quickly become the world's Instant Messaging platform of choice.

PR9.NET November 17, 2004 - One of the most remarkable aspects of our messenger software is the built-in affiliate program, truly the first of its kind. Our software has the ability to thoroughly and responsibly monitor all transactions thereby ensuring that our affiliates are properly awarded their bonuses and commission in our exclusive program.

As part of our initiatives for rapid growth and expansion, we implemented a compensation structure to reward our affiliates not only by giving them rebates on their personal purchases, but also on the purchases of the members and affiliates they invite to use our messenger. That's right! Affiliates make commissions every time their family, friends, and other contacts make purchases through the IMVITE messenger. That's not all! When any of their referred contacts invite others to use the platform, they will continue to earn commissions on their purchases as well. It's like having your own sales team working for you 24 hours a day!

Why would you buy an item directly from your favorite internet store if you can now go to their websites through our IMVITE messenger and get a rebate for purchasing the same item?

As an affiliate, your goal is to invite as many people as you can to use IMVITE to chat. They will soon realize that shopping through IMVITE really pays! Every time they shop, you get paid. Every time they refer others that shop, you get paid!

With IMVITE you can purchase from your favorite online stores and services. You'll also be invited to enjoy our own products and services including travel, floral, and dating services. And of course, there's much more to come.

With custom RSS feeds (choose your headline news), search engine, our SMICONSTTM smart icon technology (soon to come), and many other unique features on your IMVITE skin, IMVITE is simply the start of a new generation in instant messaging platforms. Don't let yourself fall behind!

Visit <http://www.imvite.com/andrewkhtan> and download the platform today!
