

# ViaCMS - A New Content Management System Has Become Available

Viaden Inc, November 17, 2004

URL: <http://www.pr9.net/comp/internet/1327november.html>

*ViaCMS is universal software, which allows you to control the design and content of your site. Suitable and pleasant interface lets you to manage all resources of your site without professional designers and programmers hiring. The process of managing content of your site becomes a real pleasure. We have developed additional functions that give our product advantages before similar ones.*

PR9.NET November 17, 2004 - Produced by Viaden Inc, ViaCMS accumulates the 10 years experience and hard work of Viaden Inc programmers and designers. Using Viaden Inc web content management tool, every person who has no skills in web-programming or html-coding can easily support, edit, personalize content and redesign any website. The product of ViaCMS is a multifunctional system designed to make website management easy, visual, completely web based and affordable.

The site administration is realized by the site administration section which is not available for another user. As soon as the webmaster saves data, the result is reflected on the site. Moreover, it's not a problem anymore to personalize the content by one self in a strong compliance with one's requirements and estimations.

ViaCMS means webmasters time and money saving. In order to develop a site, personalize content or provide support a programmer, designer and HTML-coder should be hired. But it costs a lot of money, 12000\$ at least. ViaCMS Software costs just 195\$. So, the purchase of Viaden Inc program will save money and time, webmaster could spend on hiring new employees or paying for Web design Companies services.

The distinguishing feature of ViaCMS is that it gives a chance to administrate access permissions in order to allow a few users to control different section of the site at the same time.

Easy and fast site maintenance - Total content control - Money and time saving
