ABC Office is proud to announce a line of digital voice recorders that capture sound, speeches and conversations. The recorded sound can be transferred to a computer for later editing or note taking.

PR9.NET March 09, 2005 - KAYSVILLE, Utah – ABC Office is proud to announce a line of digital voice recorders that can easily capture sound, speeches and conversations. These digital voice recorders are the equivalent for sound as digital cameras are for images. These recorders store the audio, some up to 18 hours that can later be transferred to a computer for editing or later note taking.

These digital voice recorders are growing in popularity among doctors, lawyers, students, professors and more. Rather than having to worry about a tape, all the data is stored digitally in the recorder that can later be stored to a computer and burned to a CD. Tapes will break down over time. Digital data will retain its integrity for years. Tapes are also limited to a small amount of space, usually from 20 to 90 minutes, depending on the recorder. Digital voice recorders are available in models that will record as little as four hours or as many as 18. Sound quality also increases with digital voice recorders.

Doctors often use these recorders for dictation with patients that can later be recalled or typed. Students will use these recorders for recording lessons in class, allowing them to interact and give their full attention and later replay discussions for note taking. These recorders are also very popular with private investigators and reporters. A voice recorder can be a lifesaver when trying to gather as much information as possible for a story or news article. A built-in speaker, or included headset, lets you listen to previous recordings on the spot.

Digital voice recorders are compact and can easily be fit in a purse, a pocket or other locations. For recording conversations, a voice recorder can easily be placed next to a podium or pulpit without creating an eyesore. A phone attachment allows phone conversations to be easily recorded. This is ideal for recording conversations with loved ones or to gather evidence. In order to save battery life, a VOX/VOR feature is built in that will only record when sound is present.

The complete line of digital voice recorders can be viewed by going here: <http://www.abcoffice.com/digrecord.htm>. A helpful digital voice recorder guide can be viewed by going here: http://www.abcoffice.com/dvr_guide.htm. Digital voice recorders are a great way to help you stay organized, record speeches, conversations and more.

If you have any questions, please call toll-free (+1-800-658-8788) Monday through Friday from 7:00 a.m. - 6:00 p.m. MST. A knowledgeable customer service representative can then assist with answering questions regarding digital voice recorders. Orders may be placed securely by phone or through our secure online shopping cart.

For further information, please contact David Stuart, Marketing Supervisor of ABCOffice.com, +1-800-658-8788, dstuart@abcoffice.com.
