CVPlus Visual advanced recruitment software is awarded a 5 star rating by the Softpick software promotion and distribution network.

PR9.NET March 21, 2005 - Alex, Softpick Network's Webmaster said: "I am happy to be able to list CVPlus Visual recruitment software on the Softpicks Network. It really is a valued contribution that I and the rest of my team sincerely appreciate. We have checked the software twice and it is great."

Produced by Swiftpro Ltd, CVPlus Visual advanced recruitment software is available as trialware from www.softpicks.net. Swiftpro Ltd. purposely chose to offer a fully functional evaluation copy of CVPlus Visual that lets prospects try before they buy. The only restriction is the number of active data records a user can create: 500.

Since launching its trialware version of CVPlus Visual recruitment software late last year, Swiftpro Ltd. has reaped the benefits of greater brand and product awareness plus an increased number of international sales.

As a leading provider of advanced recruitment software since 1991, Swiftpro Ltd. has established an international reputation for innovative, reliable and competitively priced business solutions. Swiftpro's popular CVPlus Visual front office recruitment software currently processes more than 5 million applicants annually across the globe.

Designed to make busy recruitment companies and corporate HR departments far more effective, CVPlus Visual organises, automates and streamlines all business processes. The current version, CVPlus Visual 2.1 features automated CV processing, powerful search and match capabilities, advanced contact management tools, an excellent job tracker and complete Web integration.

In the hotly contested world of recruitment, a company's choice of software can determine how well it competes and its consultants perform. Swiftpro Ltd. believes that as every recruitment company works slightly differently, it is extremely important that potential clients have every opportunity to assess CVPlus Visual against their business needs and preferred work methods. Only in this way can they make a fully informed decision to purchase.
