Only six weeks after launching the Aeon product line, Cyberlux Corporation announces an expanding Aeon sales network that connects dealers with customers from coast to coast.

PR9.NET June 23, 2005 - RESEARCH TRIANGLE PARK, N.C., -- Only six weeks after launching the Aeon product line, Cyberlux Corporation announces an expanding Aeon sales network that connects dealers with customers from coast to coast.

To qualify as an Aeon dealer, industry professionals must meet a range of criteria including their market reach, years in business, annual revenue, customer base and their ability to effectively represent Aeon products with Cyberlux solid-state lighting technology.

"We are excited by the response we've had and the quality of the dealers who want to become Aeon product partners. While we have been actively qualifying dealers for a short period of time, we now have 15 major markets, including San Diego, San Francisco, greater Chicago, Tampa and Toronto, addressed in our dealer network," said Mark Schmidt, COO and president of Cyberlux.

Cyberlux is continuing to qualify dealers across the country to join its Aeon sales network. Eastern, Southern, Western and Midwestern regions of the United States, as well as multiple Canadian markets, have qualified dealers identified to sell and install Aeon products.

"Our goal with the dealer network channel is to have a presence in all of the top 50 housing market in the U.S. and Canada, so that we can meet the increasing needs of contractors, designers and homeowners who are seeking the long-term light life and heatless benefits of Aeon products," said William Walker, Cyberlux vice-president of sales. "It has been six weeks since our Aeon product launch, and already we are well on the way to meeting that goal."

With the initial dealer network established, customers can contact Cyberlux, either through the Cyberlux call center (1-800-939-CYBL) or the Web site to find dealer locations in their area.

About the Aeon Products

The Aeon task and accent lighting products are made with diodal elements and do not require bulbs. The result is a product that is maintenance-free, cool to the touch with long-lasting energy-efficiency. The Cyberlux Aeon line includes three grades of products: Aeon, Aeon Plus and Aeon Pro.

- * Aeon is the basic, easy-to-install, solid-state diode lighting fixture.
- * Aeon Plus includes an additional variety of configuration possibilities to solve a large number of lighting needs.
- * Aeon Pro is the top tier of the Aeon line. It includes three light rod lengths in addition to the configuration choices of the Aeon Plus.

About Cyberlux Corporation

Cyberlux Corporation (OTC Bulletin Board: CYBL) has created breakthrough lighting technology that provides the most energy efficient and cost effective lighting solutions available today. Several products are designed to address emergencies such as power outages or critical security lighting needs. Others bring newly developed heatless light into the home for use in closets, cabinet interiors and under cabinet lighting for kitchen counters. Cyberlux uses solid-state semiconductors, trademarked as its diodal(tm) lighting elements, which consume 92 percent less energy than incandescent elements and perform for over 20 years in contrast to 750 hours for traditional bulbs.
