Latest product from Elecard supports DVD playback

PR9.NET July 20, 2005 - Tomsk, Russia – Elecard Ltd (<http://www.elecard.com>), a leading provider of professional CODECs and compression technology, continues to broaden its family of consumer products - Elecard DVD Player is available for purchase now at http://www.elecard.com/products/dvd_player.shtml. Very stylish and intuitive interface, set of useful features, and competitive price make Elecard DVD Player a decent addition to your "must have" list of applications.

Elecard DVD Player allows the user to play DVDs or media files/a list of files. It provides high resolution and full quality playback of MPEG-2 and MPEG-1 video streams based on Elecard MPEG2 Video Decoder. The built-in MS DirectShow® decoders enable Elecard DVD Player to play a number of common multimedia formats, such as AVI, WAV, MP3, and MOV.

Among the player features are full resolution DVD video playback at 720x480x30fps for NTSC and 720x576x25fps for PAL; hardware acceleration support; deinterlace modes support; playlist creation, editing and playback; ability to select the language of menu, audio, subtitles; ability to play each media file in a new player instance; subtitles (closed caption) support; subpicture support; variable playback rate (step-by-step modification from 0.1 up to 2.0 of normal rate); shuffle playback of the playlist.

"We've had great success with Elecard MPEG Player implemented on our MPEG2 video decoder engine, so we are confident that our new DVD player based on the improved engine will serve as a reliable and robust solution providing the best possible quality," said Andrey Posdnyakov, the president of Elecard. "My thinking is that Elecard DVD Player has all the features necessary to meet the user needs for an easy-to-use and powerful DVD player."

###

About Elecard Ltd

Elecard is a leading provider of high quality software products for video and audio playback, editing, analysis, multimedia content preparation and streaming. From 1995 Elecard has been developing products and solutions for digital TV. Late in 2006 Elecard has released its SIGMA iTV system, which is provided as reference designs or firmware solution with AVC/H.264 and MPEG-2 HD support for broadband, broadcast, IPTV, cable, satellite, and terrestrial Telco operators and system integrators. The Elecard group consists of 7 IT companies. Elecard is headquartered in Tomsk, Russia, where it was founded in 1989.
