Single moms searching for ways to create extra income without spending more hours away from home and children are turning to their computers in record numbers. While many have found their niche with sites like E-bay, others have found the time requirements for such businesses to be too great. Looking for more automation and fewer demands on their time, single moms have flocked to AutomaticBuilder, along with thousands of other "webpreneurs".

With their emphasis on the need to work at home and be able to produce a great second income or even a primary income source, AutomaticBuilder fits the bill. A business that is not only less time intensive, AutomaticBuilder can fit the schedules (and budgets) of the busiest single moms and people from all walks of life. Just as the name suggests, AutomaticBuilder offers a system which can grow one's business quickly and operate on virtual auto-pilot.

PR9.NET August 04, 2005 - The vast majority of entrepreneurs find the most difficult part of starting and succeeding in business, on or off the web, has been presenting the business and following up with potential customers. These two key ingredients to success are often the downfall of otherwise capable small business owners. While these "sales" skills can be learned, they have eluded most work-at-home hopefuls. That is where AutomaticBuilder comes in. It is creating success for the 98% of the world who are not salespeople by doing all of the "selling" for the business and following up with website visitors.

Great presentation websites, combined with a totally automated follow-up series remove the "I just can't sell" excuse from the vocabulary of AutomaticBuilder marketers. Other irrelevant excuses include: "I don't have time," "I don't have money," and "I don't know how." Not only is the system easy and quick, it requires an initial investment of only \$2.95 shipping and handling to get a free product and a 30 free trial of the system.

The product, highly visible in the media recently, is Sublingual B-12 & the Acia Berry (as see on the Opray Show). It is offered by Nutronix International, the company which recently joined forces with AutomaticBuilder in presenting this opportunity. Nutronix is a six-year old debt-free wellness company who with a passion for improving the health (and wealth) of all their customers. They have a product line that includes nearly 30 affordable life-changing products in addition to the B-12.

Nutronix is a global company doing business in over 60 countries. Since last December when Nutronix and AutomaticBuilder joined forces, the business and product line has just exploded. With the ability to offer this "try it before you buy it" business, nearly 15,000 people have taken advantage of becoming "webpreneurs" and learning to succeed on the internet.

Support and training to acquire this knowledge are available to all – even during the free trial. Resources are offered at the AutomaticBuilder members' section to teach everyone how to market their new business, regardless of their budgets. Free and low-cost promotions are available which can get even the newest newbie off to a running start with the business and make them internet savvy as well.

For single moms or anyone who is short on time and funds, there simply isn't any other company on the net that offers this "try it before you buy it" risk-free way to get started in an internet business. AutomaticBuilder and Nutronix are unique on the world-wide web and are committed to giving the global community a chance at the rewards of an internet business.

Learn more about AutomaticBuilder and get sublingual b12 for free by visiting <http://www.automaticbuilder.com/6583/?source=pr9>
