Engineer-to-Order Manufacturers get Discounted Modifications for ERP

PR9.NET August 23, 2005 - The Mods Store is a library of modifications Encompix has developed for its customers over the years. The Store likely contains modifications developed for another customer that would be useful to other ETO (Engineer-to-Order) ERP (Enterprise Resource Planning) users. Modifications can be purchased at discounted prices through the Mods Store.

Specific modifications can be searched by version, module, keyword, and by functional description.

The base price of each modification is displayed within the store. In addition to the base price, customers will have to pay a small fee to apply the modification to your database. (The modification may have to be tweaked to work in the customer environment. For instance, if a customer purchases a Release 9.2B modification but are running Release 9.1, there will be additional cost for making the modification compatible with that version of the software.)

According to ETO Institute (www.etoinstitute.org) spokesperson, Thomas R. Cutler, "Encompix continues to take the leadership role in technology solutions for the Engineer-to-Order manufacturing sector."

Encompix (www.encompix.com) has filled the manufacturing software requirements of Engineer-to-Order companies since 1992. The company name reflects the commitment to developing business application solutions that encompass the complex areas of project-based and job-based manufacturing. Encompix provides ETO manufacturers with a competitive advantage by improving bottom line results.
