Computykes encourages Local Schools and Child Care Centers to utilize Computykes as a source for computer classes in their own facilities.

PR9.NET August 26, 2005 - Shrewsbury NJ - Computykes Computer Center in Shrewsbury, NJ announced the availability of their portable Imagine Tomorrow® Computer Classes for Kids at Local Schools and Child Care Centers.

Computykes offers Imagine Tomorrow® Computer Classes for Kids, which combines a fun learning adventure with sophisticated technology concepts in a creative way that teaches children to use computers as a tool for learning. Children work on their own computers using Imagine Tomorrow® software that is custom built for each lesson and dynamically adjusts to each child's academic and technical ability levels. The Computykes portable program is designed to bring the power of Imagine Tomorrow directly into local schools and child care centers. Computykes provides an Imagine Tomorrow certified teacher to lead the classes, which are kept small to ensure one on one interaction and maximum effectiveness. Every aspect of offering computer classes at an educational facility can be outsourced to Computykes, including registration and administration.

"Given the successful launch of the Imagine Tomorrow® program at our center, we are responding to the many requests we have had to expand our offerings to provide these same classes at local schools and child care centers," said Mike Lucich, Owner of Computykes. "While many schools have some level of computer instruction, with our emphasis on custom developed software and curriculum, there really is no program comparable to it in Monmouth County," said Lucich.

Computykes is currently accepting a limited number of educational facility partners for its school year classes. For more information on classes or to schedule a time for a consultation on the program, call 732.383.4246 or visit online at www.computykes.com
