ThePodcastingEbook has just added two new bonuses to the mix including voice-over imaging episode numbers and royalty-free music beds for podcasters to add to their podcasts. There are now four bonuses included for customers of ThePodcastingEbook: Your Complete Guide To Podcasting.

PR9.NET September 14, 2005 - TORONTO, ThePodcastingEbook, (<http://www.ThePodcastingEbook.com>), the authority on podcasting, has sweetened their podcasting kit for business podcasters and independents by adding two more valuable bonuses: voice-over imaging and royalty-free music. The imaging includes generic episode numbers one through ten and royalty-free music that they can use under their voice-overs. Other bonuses include a podcasting session log and professionally written press release template, crafted specifically for announcing a new podcast.

Customers can listen to samples of a podcast introduction recorded by a professional voice-over talent, the same voice talent that has recorded the ten episode numbers, and the opportunity to hear one of the tracks that they will receive in their royalty-free music bonus. Also available to sample are chapter excerpts and a free chapter from ThePodcastingEbook. A podcast hosted by the author Stephanie Ciccarelli can be listened to on each page of the website. In total, the bonuses are worth over \$200.00 and are well worth the \$14.95 investment.

Recently, ThePodcastingEbook has been featured in the Podcasting News, received international attention from respected media outlets and started a podcast for customers of their ebook.

Ebook author Stephanie Ciccarelli says, "Acquiring professionally produced branding is often a hurdle for most independent podcasters. With the purchase of our ebook, they will have an audio springboard to launch their podcasts from with prepackaged episode numbers and royalty-free music."

To get started quickly, customers can visit [ThePodcastingEbook.com](http://www.ThePodcastingEbook.com) and order their copy of the ebook, receiving ten free episode numbers, royalty-free music, a podcasting session log, and press release template.
