Latest version of Comodo's Trustix AntiVirus scans faster than leading competitors whilst costing less than half the price.

PR9.NET October 06, 2005 - New York, NY US. Comodo Inc., a global leader in Identity and Trust Assurance Management solutions today announced the release of the latest version of the popular Trustix AntiVirus 2005. Version 2.2 will be available for just \$19.99. The software automatically detects, intercepts and disinfects all known viruses, worms, trojans and virus like threats from desktop and network PC's.

New features include faster scanning, an improved support interface and the ability to scan removable drives such as USB mass storage devices. Control of all aspects of virus scanning is now easier than ever with Trustix AntiVirus' improved user interface. Featuring a sleeker, more intuitive design, each module of the antivirus program can be easily accessed and configured from a single, centralized, location. The system status screen provides users with an immediate 'heads-up' summary of the programs current configuration.

Trustix AntiVirus 2005 also sees Comodo making strides towards speeding up the customer support process. 'One click reporting of system information' gives users the ability to submit vital hardware and software information to support lab staff in one click. The reports accelerate trouble ticket resolution by immediately informing support staff of relevant information about a user's installation, thus ensuring that problems are resolved in the fastest time possible.

"Anything that passes information to your computer is a potential source of infection. As businesses increasingly move towards the use of mass storage devices such as USB Flash drives to back up and transfer large files, so the risk of infection grows. Trustix AntiVirus 2005 enables you to check for viruses on any drive attached to your computer, including CD's, DVD's, external hard drives, USB connected drives, digital cameras - even your iPod!" commented Melih Abdulhayoglu, President and CEO, Comodo Inc.

Trustix AntiVirus is compatible with the full range of Windows operating systems and further strengthens Comodo's range of home, network and internet security products which also includes antispam, personal firewall, secure password manager and spyware remover. Users can download a fully functional 30 day trial version from <http://antivirus.trustix.com/>

Comodo can be reached on (US) +1 800 772 5185 (Europe) +44 (0) 161 874 7070
