With 'Steerway Globular', A New Global Consciousness On The Social Perspective Of The Human Experience And Its Destiny.

Published with the service of Lulu Enterprises Inc. ('www.Lulu.com') - the world's fastest growing provider of print-on-demand self-publishing - 'Steerway Globular' is the title of a new book by Femi Agbaje, the author of "Reality Or Mirage".

PR9.NET October 07, 2005 - The new book at 'www.Lulu.com' is about the basic goals that naturally drive the human experience. And about that related are, in the sense of what together expected socially to attain, and the uniform human interactions principle required to globally attain it.

With a book industry steady shimmer prodigious of some potent mass of substantive text ready to dazzle the world of human societies with alluring, life-securing tidbits, it may be called the global environment awareness book of the moment. For, loaded with contents as such - with materials social awareness arousing, as also materials awareness benefiting - it is one book that clearly reasserts the value of good reading. Therefore, high the probability that it would draw and make admirers of readers from various primary interests.

In a very realistic, unflattering manner, the author attempts to focus attention on widely encompassing, serious living experience issues, and appears to aim the book at bringing the nations of the world together to responsibly act - locally and globally - on the problems related. Problems which he refers to as consistently mal-addressed, with continuous historical global reality costs.

But more than that, the book's view on physical environment transformation and social change; its analyses of, and its concern about what long-going as the human experience; is - as regards population the living environment - what for human society goal. The conspicuous in operating procedures how germane in terms of a social setting conducive to life experiences meaningful?

Thus, in relevantly speaking to present-day societies' organized processes; to their pattern of interactions with one another; and to consequences in general on life experience, its realism must strike many as undeniably forthright - as all challenging in a very positive way. The social facts which attest to its viewpoints and support its suggestions for attaining world stability would also hit many as very optimistic and reassuring.

For, there's a clarity of perception in it's claimed urgent need for population unity, and in its demand for rationality and for the acknowledging of a common responsibility for global future. Plus, as pertain social humanity issues to the global community, saying that first and foremost the dictates of reason - about natural rights, and about rational human conduct in compliance - demands a 'fairness' level of desirable experience to be a reality everywhere, ie. to be observable in such a majority as could be considered society-stabilizing a population percentage. That, incontrovertible is.

This book compels an insight into long-going human society psyche, and for the administration of any given human population recommends a centerpiece that is in accord with "The Concept Of The Social Essence Reality Of Life And Of Living and The Social Power Of Positive Ideas". And not of coincidence that that '(socio)-philosophical' concept, was developed by the author. More information about the book is available at 'www.Bksenlite.biz' and at 'Lulu.com'.
