Worldtvradio has announced that version 4 of its award winning software 3webtotal TV & Radio Tuner is available now. 3webtotal is an Internet television and radio tuner with more than 900 TV online channels and 4000 plus radio stations from all around the world.

PR9.NET October 16, 2005 - Since its first version launched in October 2003, 3webtotal has become the most popular internet tuner available with more than 1.000.000 certified downloads.

The idea of an Internet TV and Radio tuner was conceived and developed by the engineers at World TV Radio in 2003. The original idea behind 3webTotal is used today by many others program developers and companies in several languages.

According to Mauricio Soler Chief Engineer and Development Director of worldtvradio this new version includes many new features suggested by thousands of users of the three previous versions, amongst them:

- Real time database updates
- Search utility
- Favorite stations administration
- Bigger and more reliable database
- A new easy to use toolbar
- Station information on screen

Yolanda Rozo, Sales Manager, discussing the marketing plan of the Internet tuner said: "We believe that our users have the right to try our program before they buy it and we allow them to use a full unrestricted version of the software for 15 days free of charge or strings attached. We know that our service is worth more than the price we charge for it (US\$24.95)" and added: "our channels and stations lineup is unbeatable and we feel confident that by allowing the use of the full program for 15 days our users will discover the value of the tuner and will buy it

Who should use 3webTotal TV & Radio Tuner?

In addition to the entertainment value, the program is an extraordinary tool for Foreign languages students, Radio DJs (they will be up to date with the latest music trends), teachers, immigrants, journalists and anyone interested in foreign languages and information.

Worldtvradio has been involved in software development for more than 15 years and its latest achievement has been the production and marketing of the most advanced radio and TV tuner for the Internet, winner of more achievement awards than any other program in this field, including:

- ZD Net Five Seals Awards
- Brothersoft Five Shields Award
- Popular Software Editor's Choice Award
- Sofotex Five Stars Award
- Uptodown Editores Premiado Choice Award

In addition to a hundred more awards
