eCleave positions itself to the focal point on KPO - Pharmaceuticals from India. On the cutting edge of delivering effective IT solutions, eCleave KPO strikes it rich in a new breed of Knowledge-based offshoring as the global corporations move the process like basic data research, market research, integration and management, IT research, engineering design, medical content and services, pharmaceuticals, biotechnology, legal support, Clinical Trials, Life Sciences, researches.

PR9.NET October 20, 2005 - eCleave Knowledge process offshoring (eC-KPO) embraces the companies by providing them with a higher-end research and analytical based services in a variety of business areas specially for each and every customer.

eCleave's Knowledge process offshoring includes services such as basic data research, market research, integration and management, equity research, engineering design, medical content and services, pharmaceuticals, biotechnology, legal support, intellectual research, Life Sciences. eCleave has specialised knowledge in Pharmaceutical & Healthcare verticals.

Moving knowledge processes to offshore locations offers a compelling value proposition as it helps overseas firms to cut costs significantly.

Many have considered or in the process of offshoring processes to eCleave. eCleave possess specialized departments that focus on various areas of Knowledge Processing offshoring to cater each business user.

eC-KPO eCleave Knowledge process offshoring embraces the companies by providing them with a higher-end research and analytical based services in a variety of business areas.

Pharmaceutical and biotechnology companies are increasingly turning to contract research to control expenses and create greater operational efficiencies. eCleave KPO helps companies decide the capabilities and tools to meet changing market needs. In addition, the service helps Clinical trial sponsors, Pharmaceutical Vendors and Life science vendors understand trends and future directions on technology.

eC-KPO - eCleave's partnership models are on with a significant and paradigm shift and are that companies develop plans for KPOs. We believe sponsors will continue to seek KPOs that have minimum overhead, excel at deliverables, offer domain and technology expertise, and standardise quality of business.
