*XRackPro2 Noise Reduction Enclosure Offered to Government of Canada by IronGate Server Management*

PR9.NET November 02, 2005 - Torrance, CA – GizMac Accessories LLC, designer and manufacturer of innovative products for the Apple platform, partners with IronGate Server Management and Consulting to offer XRackPro2 noise reduction enclosure cabinets to Canada's government.

XRackPro2 is a rack mount enclosure cabinet designed to reduce noise from and add mobility to servers, RAID systems and other rack mount equipment used on computer platforms such as Apple, Linux, Windows, Sun, SGI, etc. Noise from rack mount equipment located inside the XRackPro2 will be reduced up to 75% while the heavy duty caster wheels provide a method for easily moving the rolling rack enclosure cabinet when needed.

"Canada is a growing market for the XRackPro2 noise reduction rack mount enclosure cabinet," says Tim Cave, founder of GizMac, "We are working closely with IronGate to offer the XRackPro2 to the Canadian government."

"The XRackPro2 has proven itself to be the must-have enclosure for people who are integrating high performance computing equipment within their creative workspace," says Sean Costello, founder of IronGate Server Management and Consulting, "There are numerous groups within the Canadian Federal Government who need to host workgroup-sized installations within an office environment, and we hope that they will soon have access to the entire GizMac product line through a National Master Standing Offer (NMSO), which should be in place in time for the fiscal year end."

XRackPro2 rackmount enclosures are used in video and audio post production, film and broadcast applications, graphics, animation, pre-press, medical, scientific, military and any other environment that needs noise reduction and/or flexibility of equipment location. Additional information on XRackPro2 and GizMac can be found on the XRack Pro web site at [www.XRackPro.com](http://www.XRackPro.com). Information can also be obtained by calling the Southern California corporate headquarters at (800) 475-1677
