ProgeSOFT, developer of ProgeCAD 2006 Professional IntelliCAD software, announced today a strategic agreement with ProgeSOFT.US to provide distribution within the United States for ProgeSOFT CAD products.

PR9.NET November 10, 2005 - Como, Italy – ProgeSOFT.US (www.progesoft.us), based in Portland, Oregon, USA, will provide sales and support within the United States for ProgeSOFT IntelliCAD resellers.

ProgeCAD 2006 Professional, the latest IntelliCAD software from ProgeSOFT, includes a library manager for discipline specific symbols, ACIS solid modeling, raster image support, rendering, and a unique set of tools that only ProgeSOFT offers. ProgeCAD software supports the DWG design file format, from version 2.6 through 2006, plus support for AutoCAD® menus, scripts, blocks, and AutoLISP®.

ProgeSOFT also offers ProgeARC 2006, architectural design software based on the ArchT design engine, and ProgeMEC 2006, for mechanical design tasks.

As part of the agreement, ProgeSOFT.US will actively promote the ProgeSOFT software in the United States. Resellers can benefit through active national marketing, co-op marketing programs, reseller support, and lucrative margins on software sales.

"We have a long history with ProgeSOFT as users and resellers of their ProgeCAD products. We felt the opportunity to expand our business into promoting ProgeSOFT products nationwide was a logical step for us. We look forward to working closely with the United States ProgeSOFT resellers." said Scott Hucke, President, ProgeSOFT.US.

"Adding a United States distributor of our ProgeSOFT products was a natural step to bringing us closer to those using our IntelliCAD products. This step will reduce the overall cost of fulfillment for our products, and provide a more local presence in the United States CAD market." Said Damiano Croci, General Manager of ProgeSOFT.

More information on becoming a United States ProgeSOFT reseller is available at www.progesoft.us.
