*Singapore Internet Web Hosting Provider 8 to Infinity Pte Ltd ([www.8.to](http://www.8.to)) enhances their Windows web hosting with the addition of ASP Dot Net 2.0 support for their new range of Windows shared and dedicated hosting servers.*

PR9.NET November 12, 2005 - "The recent release of ASP Dot Net 2.0 allows for much greater power and flexibility for our Windows users. As our company has been following the development of ASP Dot Net 2.0 closely, we are able to be one of the first, if not the first in Singapore to offer such support," said Lim Boon Chuan, Chief Technical Officer of 8 to Infinity.

The additional feature is offered free of charge by 8 to Infinity and will be a standard feature on all new Windows virtual servers offerings. It is offered as an option with dedicated servers. 8 to Infinity expects the take up rate will be high as many of the developers hosted by them had already expressed their wish to convert to ASP Dot Net 2.0

###
