Singapore Internet Web Hosting Provider 8 to Infinity Pte Ltd (www.8.to) enhances their Windows web hosting with the addition of SQL 2005 Express support for their new range of Windows shared and dedicated hosting servers.

PR9.NET November 15, 2005 - "The recent release of ASP Dot Net 2.0 allows for much greater power and flexibility for our Windows users. Together with SQL 2005 Express, this combination allows for glueless integration and cut down the time needed to go from drawing board to production. As our company has been following the development of ASP Dot Net 2.0 and SQL 2005 Express closely, we are able to be one of the first, if not the first in Singapore to offer such support," said Lim Boon Chuan, Chief Technical Officer of 8 to Infinity.

The additional feature is offered at a nominal charge by 8 to Infinity and will be a standard feature on all new Windows virtual servers offerings. It is also offered as an option with dedicated servers. 8 to Infinity expects the take up rate will be high as many of the developers hosted by them had already expressed their wish to convert to ASP Dot Net 2.0 and SQL 2005 combination.

###
