GizMac Noise Reduction Rack Mount Cabinet Offered in Apple Xserve Workgroup Cluster Solutions Update

PR9.NET November 28, 2005 - Torrance, CA – GizMac Accessories LLC, designer and manufacturer of innovative products for the Apple platform, announces XRackPro2 featured on revised Apple Workgroup Cluster web site pages.

XRackPro2 is a rack mount enclosure cabinet designed to reduce noise and add mobility to Apple's Xserve line of servers and RAID systems. Noise from rack mount equipment located inside the XRackPro2 will be reduced up to 75% while the heavy duty caster wheels provide a method for easily moving the rolling rack enclosure cabinet when needed.

"XRackPro2 was originally designed for the Xserve server and Xserve RAID," says Tim Cave, founder of GizMac, "We are pleased that our noise reduction rack mount enclosure cabinet became part of the Apple Xserve Workgroup Cluster."

XRackPro2 rackmount enclosures are used in scientific and medical work groups, video and audio post production, film and broadcast applications, graphics, animation, pre-press, military and any other environment that needs noise reduction and/or flexibility of equipment location. Additional information on XRackPro2 and GizMac can be found on the XRack Pro web site at <http://www.xrackpro.com>. Information can also be obtained by calling the Southern California corporate headquarters at (800) 475-1677
