Neoxen Systems, a software company specialized in Process and Document Management solutions, has today released the first 64/32-bit products to support the new Microsoft Visual Studio 2005 Team System. This release is targeted for distributed development teams and multilingual organizations.

PR9.NET November 24, 2005 - "As one of the very rare Microsoft Visual Studio Industry Partners in Scandinavia we feel very privileged to release our Visual Modus product family in Microsoft's major Product Release Event." said Esa Tervo, CEO at Neoxen Systems. "Visual Modus is one of the first "off-the-shelf" products in the Process Management markets, which is certified by a neutral third party certification lab in US. We are proud and honored to stamp these achieved Microsoft compatibility logos to our products."

Neoxen Visual Modus 2005 is a documentation organizer and management application. It allows users to create role-based views on information regardless of the origin and location of the data. Visual Modus provides a single point of access to manage, restructure and share this vital information. As the first 64/32-bit solution it also allows users to reformat and mass-modify Microsoft Office documents of any type for consistent archiving or for reuse in new projects.

"With the full integration to Microsoft Visual Studio 2005 we also assist our users to take the steps towards Microsoft Office 12 and the next generation of Smart Client software." Tervo continues. "This release will also act crucial role in our way to 64-bit computing and Windows Vista."

Visual Modus core application provides a solid foundation to build solutions for different vertical businesses. Neoxen Software Factory, which is part of this release, is the first packaged vertical solution and it is targeted especially for Software Engineering. It is designed to seamlessly support Microsoft Visual Studio 2005 Team System and Microsoft Solutions Framework. Furthermore, it is also compatible with, and perfectly supplements other major product development and software lifecycle management solutions from IBM / Rational, Borland, Telelogic, Softeam and Osellus.

Neoxen Visual Modus 2005 is available from well equipped resellers and directly from the Neoxen Webstore.

Neoxen Systems is a Microsoft Visual Studio Industry Partner specialized in Process Management and Improvement, and Document Management solutions for global markets.

With our Neoxen technology and product family we help our customers to succeed by reducing their time-to-market efforts, increasing their customer satisfaction, improving quality and increasing their organizational performance.
