

# Prosperity Network eliminates the 3 Biggest Obstacles to Home Based Business Success.

Internet Marketing Powered by SEO, December 02, 2005

URL: <http://www.pr9.net/business/assoc/3103december.html>

*Finally an automated, on line marketing system (Prosperity Automated System) that eliminates the three biggest deterrents to success faced by new and experienced home based business entrepreneurs alike, allowing Prosperity Network to offer an unheard of 100% money back guarantee. Sound "too good to be true," then decide for yourself.*

PR9.NET December 02, 2005 - Prosperity Network is a 12 year old company that initially released the Prosperity Automated System in October of 2003. The Prosperity Automated System is a comprehensive lead generation, marketing, product presentation and closing system designed to empower its customers to achieve financial success.

The company's founder and CEO, Bill Osterhout, a former fortune 500 executive has extensive experience with online income opportunities. And while Bill learned he had the skills necessary to succeed, the vast majority of others did not.

More importantly, through working with many such individuals Bill was able to isolate the 3 most important elements causing their failure.

- 1 Lack of sufficient, qualified prospects
- 2 Inability to deliver professional, effective product and opportunity presentations
- 3 Closing the sale

Enter the Prosperity Automated System. This system was specifically developed to address the 3 top causes of home based business failures.

First, through massive search engine technology the Prosperity Automated System finds thousands of real-time, quality prospects that are looking online specifically for lucrative home based businesses. Individual prospects are then instantly re-directed to Prosperity Network customers' business web sites via the Prosperity Automated System's proprietary software. This provides Prosperity Network customers large quantities of quality prospects to review their products and opportunities, thus eliminating the first cause of failure.

Then the Prosperity Automated System web site becomes a product and opportunity information portal for both the customer's primary business and the Prosperity Network itself. Serious prospects are provided professional, comprehensive multimedia presentations designed to describe exhaustively the products and income opportunity. In addition, third party testimonials provide credibility and FAQs answer specific, common questions. Prospects are provided all the information necessary to make an informed business decision. The net result is a system that delivers professional, effective product and opportunity presentations effortlessly.

Finally, and singularly the most powerful aspect of the Prosperity Automated System is the "Instant Contact Follow-up" process. When serious prospects request to be contacted, Team Leaders immediately call them to answer their questions. Team Leaders are Prosperity Network members/customers that have achieved a significant level of financial success with the Prosperity Automated System prior to qualifying to become Team Leaders. New members are never required to "talk the talk" prior to "walking the walk." That is, only members that have achieved significant success are answering the prospects questions, dramatically enhancing the closing process.

The Prosperity Automated System successfully eliminates the top 3 causes of home based business failure. In doing so, it empowers anyone to achieve their financial goals. In this instance, "too good to be true" (<http://togooodtobetrue.info>) is worth researching.

Tex Gshwandtner is a successful business entrepreneur with 20 years traditional business management experience in software development, systems integration management, marketing and sales. Over the last 8 years he has developed strong internet marketing and home based direct sales skills.
