With over 135 online coding and graphics generators, ROI calculators, SEO analysis and reference utilities, MainstreamWebmasters.com has launched the most complete and largest Free Webmaster Tools Center anywhere.

PR9.NET December 06, 2005 - With over 135 online coding and graphics generators, ROI calculators, SEO analysis and reference utilities, Mainstream Webmasters <http://www.mainstreamwebmasters.com> has launched the most complete and largest Free Webmaster Tools Center anywhere.

This isn't some lame couple dozen two-line JavaScript snippets tossed in to a heap either. Even the tools are beyond the same-old same-old seen elsewhere. Sure, some places have a free Page Rank Tool, so do we, but ours checks Google PR across 10 datacenters, not merely providing higher quality but the function can also be used as a Google Update (formerly known as "Google Dance") monitor.

Some places have a backlinks checker. We have three. The first gives backlinks and also the PR of the sites linking to you. The second checks links and then displays the anchor text by which each site actually uses in their linking. And the third hosted SEO tool, bypasses Google and instead ventures to Yahoo to check your backlinks.

And that's just a few of the advanced tools here. Besides state-of-the-art SEO utilities, included are analytical tools, calculators, comparisons and in-depth checkers under categories of Keyword and Domain Tools, Advertising and Pay Per Click Tools, Ecommerce Tools and Script Tools. Even the vast Web Design area has been broken down into three subcategories of tools, from initial website creation, to the next stage of adding site enhancements, and then after the site is built, security, traffic and site maintenance utilities.

We've seen elsewhere where individually some of the tools at our center are being sold for \$15 apiece and up to \$300 and beyond. Some of these are downloadable software you have to be afraid of in this day and age; while still others are online scripts but with monthly recurring membership charges to use them at all. We provide these same quality, if not higher quality utilities, online, accessible from a single page, and totally free.

At the Mainstream Webmasters Free Webmaster Tools Center, <http://www.mainstreamwebmasters.com/free-webmaster-tools.html> you can track search engine and traffic trends, run an online advertising campaign analysis, view PPC competitor bids, reverse DNS lookups, generate tables, forms, frames and CSS files, create graphics text and buttons. You can generate Google sitemaps, popup consoles, even build server files such as .htaccess, .htpasswd, robots.txt, and cron tabs.

There's an affiliate commission calculator, merchant account and processing rate comparison, basic credit card validation. You can display how AdSense will look on your sites and are displayed on your competitions sites, and 100 more invaluable tools to build faster, be more productive and help you make more money online.

###

About Clever Gloves Inc.
