Christian Business Internet Radio is set to launch January 9th.

PR9.NET December 15, 2005 - Houston, TX - The new show will hit the airwaves utilizing the latest technology to bring together a community of business professionals for practical spiritual support. Founder and host Regina Baker of Houston has launched the venture in response to the unprecedented levels of entrepreneurship that call for an increased level of solid scriptural support for faith-led business owners.

Internet Radio is on the rise with the ever advancing technology allowing for the growth of programming that responds to the listeners needs, opening the door to an opportunity to create niche communities of like-minded individuals. It is exactly that appeal of community support that Baker is focusing on for the Christian Business Talk Radio.

"There are slight differences between the traditional secular business model and those with leaders that consciously apply biblically based principles to their business," Baker says, "What this show offers is a high energy, fun approach to the issues involved in negotiating profitable business practices while remaining firm in our stand on Christian principles."

The motivational speaker has visionary plans for the show, "Christian Business Talk Radio is about harnessing the fire and passion within our souls to reach our business goals. We're going to bring 'holier than thou' down to earth and expressing the absolute thrill that comes from being our authentic selves by practicing the concepts that Christ has taught us."

Baker admits it can be a bit challenging to be producing a faith based radio show. "There are always going to be those with certain religious perceptions who will see this show as elitist or restrictive, though nothing could be further from the truth. Everyone is welcome to tune in and see that Christian Business Talk Radio is simply about bringing together information and inspiration to deal with business challenges for a group of like minded individuals who have a common thread, in this case our desire to live by Christian principles."
