Microsoft's just released web development platform, Asp.Net 2.0., has allowed Eastons-Bible-Dictionary.com to introduce a high-tech wrinkle into an otherwise ancient past time. Eastons now hosts a lightning fast, completely hyper-linked bible dictionary that makes bible study a breeze.

PR9.NET December 13, 2005 - The one indispensable tool that anyone interested in bible study must have is a bible dictionary. But bible dictionaries are cumbersome, awkward and difficult to use. If this sounds familiar, you might want to reconsider your use of one and visit Eastons-Bible-Dictionary.com .

A detailed online survey of those interested in online bible study showed that the majority of respondents were frustrated with older web technologies and poor interfaces.

Further research showed that there was not a robust and useable implementation of Easton's classic work that made it easy and enjoyable to use. Enter Eastons-Bible-Dictionary.com!

Bert terHart, a leading online learning tools developer and programmer states that "Eastons-Bible-Dictionary.com is a state-of-the art implementation of Microsoft's latest web development platform, Asp.Net 2.0. Our architecture allows for the entire site to be held in memory so that any of the more than 3000 hyper-linked pages are served as quickly as a user's browser can render them. XML and flat database files make the site perfectly usable for any Internet connection, including dial-up."

Here a 5 quick tips to help you get the most out of any online bible study session:

1. Don't bite off more than you can chew. Pick a small passage;
2. Look up every word and every related word or phrase;
3. Write down any passages that are referred to in the word and phrase definitions;
4. After looking up all the words and related words, read the passages that you came across without referencing the dictionary; and
5. Jot down your thoughts and impressions about the defined words and relationships. Review these notes before you start your next session.

Anyone can develop a rich and profound understanding of the bible by utilizing a bible dictionary. Technology has just made it that much easier!
