A review of an Outstanding Comprehensive Hypnosis Course from Taylor Star, Student of the Underground Hypnosis Community released September 2005. 25 Books and 7 CD's of Audio.

PR9.NET December 16, 2005 - A curious email dropped onto my virtual doormat, forced out from my already overflowing inbox by thousands of Viagra offers. It was from a good friend of mine and had the most interesting subject line I have ever seen, "Have you heard of Underground Hypnosis...Banned Stealth Hypnosis Techniques." It was for a product that had just been launched. He told me I just had to check this out.

My friend knows of my interest in hypnosis, magic and the works of Derren Brown et al.

But what was particular about this was that it was a full on hypnosis course, not revealing the tired old tricks like getting someone to cluck like a chicken or doing the lambada when they hear Beethoven's 9th, but using little known techniques, actually what they call "underground" stuff for getting exactly what you want in life, work, relationships you name it.

Needless to say I decided to take the bait and find out what it was all about. With a money back guarantee I had nothing to loose. Even better when I down loaded the whole course while I made a cup of tea.

A quick look over my course materials told me it was going to be a long and very exciting night as I found myself confronted with 7 Cd's of Audio and 25 Books.

I have to tell you this was like digging for gold and there was plenty of it.

The reality was that anyone with a really basic knowledge of communication can hypnotize anyone in minutes.

Have your worst enemy eating out of your hand by applying the sinister "Black Mirror Operation" and the "No Cleaver technique." This means that you can hypnotize someone during normal conversation, even make them believe that it is fundamentally wrong to disagree with you. And get this, they won't even realize they have been put in a trance.

Combine these two techniques with the "Iron Man Technique" and your life will literally be transformed.

If this stuff isn't illegal then it damn well should be.

By the way! Don't think it hadn't occurred to me how I could use these "Underground" techniques to improve my financial situation. So I was knocked clean out of my boots when I heard about hypnotizing by Email. If only the top marketers knew about this one.

I was suddenly congratulating myself for owning hours and hours of the most sought after information ever to flood the hypnosis underworld.

I've seen most every kind of product out there on hypnosis and it's easy to pass them by, after all they all amount to the same old tricks but differently packaged.

I believe this one is different. The Underground Hypnosis Course definitely gets my vote and I challenge anyone to beat it.

I won't wait up.

Further information is available from a web site they have at <http://www.hbtech.co.uk>
