*Portland, Oregon, USA –The West Linn Task Force on Sustainability chose Portals ([www.portlandportals.us](http://www.portlandportals.us)) today as their Metadot Hosting Solution, to provide a highly secure web portal for supporting the sustainability initiative for the city of West Linn, Oregon.*

PR9.NET December 14, 2005 - By direction of the City Council, a task force of citizens is looking into ways city government, the community and individuals can improve sustainability practices. The task force has less than 8 months to develop and deliver a Sustainability Strategic Plan to the City Council. The task force is using the Metadot Portal Server from Portland Portals to manage the process.

"Metadot helps the task force keep all information centralized in one place and supports our workflow with email integration and project management" said Ken Hall, Architect and chair of the task force. "Sustainability is a critically important to our future and the volume of information to be managed is very large. We need tools that help us make decisions and track our progress in order to finish our task on time."

Portland Portals Metadot Hosting allows small and medium size organizations to benefit from the collaboration tools used by large corporations and governments without the usual large investment required for similar solutions. Based on the Metadot Portal Server, an open source intranet extranet solution, the Portland Portals Hosted Solution products are perfect for small and medium sized companies sharing data with their internal teams, and external partners and clients.
