Parasoft Corporation announced that Jtest has won InfoWorld's Technology of the Year Award in the category of Best Application Test Tool.

PR9.NET January 03, 2006 - Monrovia, CA. Parasoft Corporation, the leading provider of automated error prevention solutions for software development, announced today that Jtest, its industry leading automated Java unit testing and code analysis product, has won InfoWorld's Technology of the Year Award in the category of Best Application Test Tool. InfoWorld announced the winners on January 2, 2006.

"InfoWorld's Technology of the Year Awards recognize the best, most innovative products in their class," said Dough Dineley, executive editor of the InfoWorld Test Center. "Parasoft's Jtest 7.0 impressed us not only with its amazing scope, but with all you can accomplish without coding."

In use at thousands of software development organizations worldwide, Jtest provides comprehensive automated test and analysis of java code. Integrated tightly with the software development process, Jtest allows development teams to adopt a "test as you go" strategy that promotes testing code as it is developed so that quality is built into the code from its inception and bugs eliminated before they can infect the rest of the code base.

"For industrial-strength Java application testing, this is the tool to get," said Rick Grehan, editor of InfoWorld. "In short, Jtest is becoming a one-stop-shopping Java-testing super center that copes with just about every Java component you might develop, regardless of its run-time requirements."

###

About Parasoft Corporation

Parasoft is the leading provider of innovative solutions for automated software test and analysis and the establishment of software error prevention practices as an integrated part of the software development lifecycle. Parasoft's product suite enables software development and IT organizations to significantly reduce costs and delivery delays, ensure application reliability and security, and improve the quality of the software they develop and deploy through the practice of Automated Error Prevention (AEP). Parasoft has more than 10,000 clients worldwide including: Bank of America, Boeing, Cisco, Disney, Ericsson, IBM, Lehman Brothers, Lockheed, Lexis-Nexis, Sabre Holdings, SBC and Yahoo. Founded in 1987, Parasoft is a privately held company headquartered in Monrovia, CA.
