*Titan Nano iPod Cases From GizMac Accessories Now Available for Pre-Ordering*

PR9.NET February 21, 2006 - Torrance, CA – GizMac Accessories LLC, designer and manufacturer of innovative products for the Apple platform, announce the Titan iPod Nano cases are now available for pre-order.

GizMac announced and displayed the new Titan iPod cases in their booth at the MacWorld Exposition last month. The new Nano iPod cases are part of GizMac's emerging line of cases for the Apple iPod.

"What separates the Titan iPod case from the competition, is the many number of ways the Titan iPod case can be worn," says Tim Cave, founder of GizMac, "The other great feature of our Titan iPod case is the incredible anodized aircraft aluminum finish, anodizing produces amazing colors not found in plastic, rubber or leather iPod cases...purple, gold, pink, aluminum and black will be our initial colors for our iPod Nano cases, future colors will include blue, orange, red and others."

"Cause Everyone Wears Their iPod Differently" is the motto of the Titan iPod case for a good reason, the included carabiner clip, arm band, belt clip with 360 degree rotation (for vertical, horizontal or any position in between) and lanyard accessories provide a wide range of ways to wear the iPod case. The Titan goes even one step further with the ability to easily change whether the top or the bottom of the iPod Nano case faces upward or downward, providing unmatched flexibility in an iPod case.

In addition to its unique look from using anodized aircraft aluminum, the Titan iPod Nano case also provides a superior strength to weight ratio by the use of lightweight metal. Not only does the aluminum Nano case protect the iPod, but the included screen and scroll wheel protector also shield the iPod from other potential damage.

Further details on the new Titan Nano iPod cases can be found on the GizMac Accessories web site, <http://www.GizMac.com>. Information can also be obtained by calling the Southern California corporate headquarters at (800) 475-1677.
