Rahul Shetty has been awarded the first prize under the faculty of Medicine, University Laval, Canada, for his idea at the 4th Edition of Ideas contest. This prestigious contest was conducted by the Entrepreneurial Department of University Laval.

PR9.NET February 18, 2006 - Quebec, Canada, At the 4th Edition of Idea contest which was organized by the Entrepreneurial Department of University Laval, Rahul Shetty's Project has won the first prize in the Medicine Department. A Total of 126 ideas from different faculties of University were submitted. These projects were analyzed for the potential for future success. Amongst the project submitted in Department of Medicine: Rahul Shetty Project had won the top prize. The 4th edition of the Contest had entries from 12 different countries.

The prize was awarded by Mr. Marc-Andre Richer, MBA, director regional, Quebec, BMO-Bank of Montréal along with chief guest, Mr. Michel Pigeon, Rector of University Laval.

Says Dr Shetty "Technology should be beneficial for the masses and not just restricted to classes". The idea will empower professionals and also general public to have better understanding of the health issues in today's world.

Cardiac diseases are the No 1 killer in developed countries today. There is an inadequate understanding of the Cardiovascular disease process. The Technology will be beneficial in better understanding of the cardiovascular physiology for general public and thereby have improved health outcomes in the future.

The prize has helped in validating technology around the project and has encouraged for future commercial success.
