Voice123 is the company that can help you do your own podcasts as easy a 1, 2, 3.

PR9.NET February 22, 2006 - New York, NY - You've probably already noticed the increasing popularity of podcasting. Everybody has heard about it, a lot of people talk about it, and just some really know what it is. Podcasting is a new way to publish and distribute content on the Internet. A podcast is actually an audio or video file that can be downloaded to a computer, listened to directly from a website, or transferred to portable audio players. The main benefit is that it allows you to get the information that you want, when you want it, and where you want it.

Podcasting is now a tool that many companies and individuals are using for entertainment, communication, and advertising purposes. They use podcasting to distribute news, seminars, programs, trainings, commercials, articles, newsletters, lessons, and any other type of content that you can imagine.

Nowadays, podcasting is more popular among Internet-related companies. The UK Association of Online Publishers suggests that more than half of online publishers plan to launch a podcast in the next 12 months. This should be a must for online publishers, but can be a competitive advantage opportunity for companies that don't publish a lot of content online, but that do business online or simply own a website.

The question now is, how to podcast? The first thing you need to know is that you can podcast anything. Don't worry about what others are podcasting. You can podcast what ever you want. Then next step is to get the content. Just write, collect, compose, copy, or compile the information you want to podcast. Finally, record the podcast. But, how do you record a podcast? Well, the solution is a company called Voice123 (<http://voice123.com/s/podcasting.html?c=p11>).

Since podcasts are audio files, you need to take care of choosing the voice that will record your podcast. Voice123 has the largest online database of voice over talents to help you search for and find the voice that can record your podcast, meeting your time and budget requirements. At Voice123, you will find voices for any type of podcast, no matter the length, language, sound effects, or any other special features you would like to have. You will be surprised by the amount of voice talents, the quality of the recordings, and the speed at which you will get your podcast finished.

At Voice123 you will not only find voice overs for podcasting projects. Their website also includes voices for any type of voice over recording, ranging from radio and television commercials, to movie trailers, corporate presentations, cartoon characters, on-hold messages, and IVR systems, amongst others.

Join the podcasting stream, visit the Voice123 website (<http://voice123.com/s/podcasting.html?c=p11>), get the best podcast, and impress your customers and visitors. Podcasting will allow you to explore a new communication tool that focuses on giving users what they needs and want. Just keep in mind that innovation is key and that the limit is your imagination.
