This new tool lets any on-line marketer or webmaster setup a new domain and instantly have thousands of on-topic, keyword specific targeted backlinks. The innovative software is ideal for web site promotion and to increase page rank.

PR9.NET February 02, 2006 - Chicago—Webmasters now have a new web site optimization tool with the announcement of Voodoo Blogger, offering SEO software that puts blog and ping efforts in hyperdrive.

This new software automates the process of obtaining thousands of high quality backlinks, or incoming links and one-way links. It saves tremendous amounts of time and cuts labor for webmasters.

"This is a hundred times more powerful than any other software in use, because it does all the work instead of making you do it," said Tim Foss of Voodoo Blogger. "Within seconds of posting a new domain you can use this software to create thousands of high quality backlinks. You'll dominate MSN within a day or two, you'll take over Yahoo within a week or two, and you'll rule Google when they do their next dance."

How does his software do it?

"Lets say that over the past couple of weeks you created 1,358 new unique blog accounts and today, you purchased a new domain that you are going to promote. Well, within a few seconds, you can have a link on all of those blogs pointing to your new site. All of the posts are on topic, all are relevant, and all are keyword targeted," explained Foss.

Features:

- New Elite Edition Makes Detection Basically Impossible!
- Creates Unlimited Blogs FAST
- Create thousands of keyword specific backlinks to your other sites.
- Create 1000's of AdSense blogs quickly and easily.
- All blogs created are pinged when you post.
- Create blog clusters designed to skyrocket Google page rank
- Use custom posts, or let the software do it.
- Use custom post title, or let the software do it.
- Use custom keyword targeted blog description, or let the software do it.
- Generate 100's or 1000's of blogs promoting your affiliate programs.
- Use a single theme for all blogs created in a cluster, or randomize for full stealth.

"All of the major AdSense players know that it is all a numbers game. The bigger numbers you run, the more money you make. Simple. The only downside to this was that it just took way to much time to create a blog and set the settings properly, and then do it enough times to generate the numbers you need. Now that process is automated," said Foss.

He provides full details on the functions and operation of the new software at <http://www.trafficexplosion2.com/voodoo blogger/phc/>.
