*Managing Director of Equinix Hong Kong to Lead Equinix Operations Throughout Asia-Pacific*

PR9.NET March 21, 2006 - Singapore – Equinix, Inc. (Nasdaq: EQIX), the leading provider of network-neutral data centers and Internet exchange services, today announced that Samuel Lee has been appointed as vice president of Equinix Asia-Pacific. In this capacity, he will oversee all Equinix operations in the Asia-Pacific region, including Internet Business Exchange™ (IBX®) centers in Tokyo, Hong Kong, Singapore and Sydney. He will report directly to Equinix CEO Peter Van Camp.

With more than 15 years of experience in the telecommunications and IT industries in the Asia-Pacific market, most recently as managing director of Equinix Hong Kong and Pihana Pacific Hong Kong, which was acquired by Equinix, Lee has a strong background in executive management. Under his tenure, the Hong Kong IBX became an EBITDA (earnings before interest, taxes, depreciation and amortization) and cash flow positive operation. Lee also successfully led the Equinix Hong Kong team in building a strong position for Equinix in providing business continuity and disaster recovery services for the financial services industry in Hong Kong.

"Samuel has a strong track record of success in managing Equinix's Hong Kong operations, as well as a wealth of management expertise in the telecom and IT industry," said Peter Van Camp, CEO of Equinix. "In his five years with Equinix and Pihana Pacific, Samuel has demonstrated his business leadership in one of our most difficult markets from a pricing and competitive standpoint. I look forward to working closely with Samuel as we continue to grow our operations in the Asia-Pacific market."

Prior to joining Equinix in 2000, Lee served as managing director of Pacific Gateway Exchange (PGE), a provider of wholesale and retail long distance, Internet, and bandwidth services. In this position, he spearheaded the company's expansion into the Hong Kong market, focusing on carrier services, such as voice wholesale, bilateral relationships, capacity and backhaul sales, and Internet business services, including transit, colocation, and content delivery services.

Prior to PGE, Lee founded Telekom Consulting Limited, a consulting firm offering strategic assistance to network providers in the deregulated telecommunications market in Hong Kong and Asia. Lee also held management positions at Teleglobe International, Intel and Sprint. Lee holds a B.A. from City University of Hong Kong.

## About Equinix Asia Pacific Pte Ltd

### About Equinix

Equinix is the leading global provider of network-neutral data centers and Internet exchange services for enterprises, content companies, systems integrators and network services providers. Through the company's Internet Business Exchange™ (IBX®) centers in 10 markets in the U.S. and Asia, customers can directly interconnect with every major global network and ISP for their critical peering, transit and traffic exchange requirements. These interconnection points facilitate the highest performance and growth of the Internet by serving as neutral and open marketplaces for Internet infrastructure services, allowing customers to expand their businesses while reducing costs.
