Technology Group International Announces New Functionality

in the Latest Release of Enterprise 21 ERP Software

PR9.NET April 05, 2006 - Toledo, OH - Toledo Ohio based Technology Group International (TGI), a leading ERP software solution provider, announces enhanced functionality in the newest release for Enterprise 21.

As part of its 2006 Users Conference last month, TGI revealed a significant amount of software enhancements in the newest release of Enterprise 21. Version 6.5 offers a substantial amount of new functionality ranging from user specific dashboards and trending reports to enhanced CRM functionality and third party integration.

Specific feature and functionality enhancements include items such as:

- Integration to Microsoft Outlook
- Integration to Microsoft MapPoint
- VOIP integration for CRM activities
- User specific dashboards with integrated

DSS reporting, customized graphs, drilldown capabilities, and export to Excel, HTML, or e-mail

- Enhanced "How-to" help available online for easy to follow instructions on transaction processing
- Enhanced audit tracking for regulatory compliance
- Trending of accounts receivable and accounts payable activities
- Enhanced CRM functionality for prospecting and lead generation
- Enhanced CRM functionality for direct marketing
- Enhanced MRP processing and production scheduling for machines and employees
- Improved production scheduling and processing in manufacturing to accommodate make-to-order environments
- Enhanced lot processing & reporting of associated history
- Enhanced trending of inventory levels and turns
- Increased WMS functionality for RF environments

The newest release of Enterprise 21 is available to all maintenance customers as part of their standard support agreement.
