On April 25th Digital ink pioneers, solution providers and Mi-Forms users gather for 4th Annual Mi-Co User Days in Research Triangle Park NC

PR9.NET April 24, 2006 - Research Triangle Park, NC. When Mi-Co's cofounder and Chairman of the Board, Jim Clary, opens the 4th Annual Mi-Co User Day on April 25th at the Radisson Hotel Research Triangle Park he will look out into an audience that includes key pioneers and market leaders in digital ink technology.

"As a company, Mi-Co has been working with digital ink and mobile information technology since 1999," said Clary, "and individuals on our staff have been personally involved in digital ink solutions long before that. It is an honor to be opening a conference where heavyweights of digital ink technology—including IBM, Lenovo, Electravaya, and Logitech--are working with Mi-Co to bring a first class experience to the Mi-Forms user community."

Among the major activities at the two day event include a keynote address by Dr. Krishna Nathan, the top services executive in IBM Research and an expert in handwriting recognition technology. In addition, the latest digital ink technology from digital pen manufacturer Logitech and a number of key Tablet PC manufacturers will be on display.

Current implementations of digital ink and mobile data capture solutions will be presented by a number of organizations converting handwriting into electronic form to increase data capture efficiency. These user presentations will include representatives of home health agencies, hospitals and governmental entities.

Dr. Greg Clary, Mi-Co Co-Founder and formerly a member of the IBM team at the T.J. Watson Research Center that worked on innovative handwriting recognition and pen input systems in the 1990s will close the first day of presentations by giving a glimpse into the future of digital ink technology.

Mi-Co User Days is the premier event highlighting mobile information solutions, mobile data capture technology and digital ink applications using the Mi-Forms System. The two-day event is designed for users, Mi-Co partners and interested organizations to discover the latest developments in mobile information technology, to explore new ways of using Mi-Forms and to network with mobile data capture and digital ink industry leaders. The conference is organized by the Mi-Co User Day Executive Committee, which is comprised of selected Mi-Forms users, partners and staff. The fourth annual user days will be held on April 25 and 26 in Research Triangle Park, NC.
