*FreeTEL System launches new website, a one stop and shop for Free Internet Telephone services.*

PR9.NET May 01, 2006 - Whitman, Massachusetts - FreeTEL System today announced its new Website, the most reliable site that offers Internet Telephone Services for businesses, home users, international students and those who frequently spend time on long distance calls. FreeTEL System website is available today at [www.freetelsystem.com].

"Many companies operate website to provide free Internet Telephone services to consumers, but their customers may not receive full support when facing technical problems, having questions about the features, functions of the Internet Telephones or Gateways. Surfing FreeTEL System Website, customers can find most answers for their questions such as what telephone package is suitable; how each Internet Telephone/Gateway operates; what definitions of certain technical terms are used in Internet Telephony Industry; or how FreeTEL System service benefits the consumers. In short, we are confident that the professionalism of our Website, the 24/7 prompt response from our technical support team and the guarantee of our service will satisfy all consumers." says Mr. Simon Tran, President and Chief Executive Officer of FreeTEL System.

"FreeTEL System useful information Website outstands itself from many other service Websites. It is where businesses, home users and travelers can find and discover the most valuable and effective Internet Telephones/Gateways that they might want to buy online at very affordable prices." says Mr. Hieu Ho, Vice President and Chief Technology Officer of SupraLink Solutions.

"Welcome to the world of saving. With FreeTEL System, you can make and receive calls as you always do, but your calls are totally free for life and your long distance phone bill will be gone completely. We can affirm that FreeTEL System goes in the right direction to satisfy customers and becomes the should-have service for those who want to save money on long distance calls", says Mr. Tim Nguyen, Vice President of Solutions Network.
