GizMac Accessories Provides New Details on Upcoming 25U XRackPro2 Noise Reduction Enclosure Rackmount Cabinet

PR9.NET May 08, 2006 - Torrance, CA – GizMac Accessories LLC, designer and manufacturer of noise reduction enclosure rackmount cabinets, announces new information on their XRackPro2 25U Noise Reduction Enclosure rackmount cabinet.

Building on their success with their 12U XRackPro2 rackmount cabinet, GizMac will be releasing a 25U version. The soon to be released 25U rackmount cabinet will give new and existing customers a much needed solution to quiet larger amounts of noisy rackmount equipment.

"The 25U XRackPro2 rackmount cabinet will hold over double the rackmount equipment, but cost only 22% more than the 12U rackmount cabinet," says Ken Vitto, Director of Marketing for GizMac Accessories, "A 25U size noise reduction enclosure rackmount cabinet will make it feasible to use in small to medium sized data centers to lower noise levels or a company can use the XRackPro2 to keep their equipment near the users and thereby eliminating the need for a dedicated machine room."

XRackPro2 25U is a solution for rackmount Apple, Windows, Linux, Sun, SGI and other servers as well as RAID storage, tape and disk backup, networking, battery backup (UPS) and other systems. Although the XRackPro2 was designed primarily for rackmount equipment, the height of the 25U XRackPro2 rackmount cabinet will allow some vertically standing non-rackmount equipment to fit inside the rackmount cabinet.

By reducing noise levels, the 25U XRackPro2 rackmount cabinet allows computer, audio / video, medical and other equipment to be placed in areas that require low noise. Post production film, video and audio editing; television, cable and radio broadcasting; health care, dental and veterinary locations; military, education and government or any other environment that requires low noise will benefit from the GizMac noise reduction enclosure rackmount cabinet.

Pricing for the 25U XRackPro2 rack mount cabinet is expected to be \$2,199 US retail when pre-orders start mid May. Additional details can be found on GizMac Accessories' XRackPro web site at <http://www.XRackPro.com> and by calling the corporate headquarters at (800) 475-1677.
