e-Zest achieved stupendous growth in healthcare vertical in FY 06-07 which ended on 31st March. e-Zest focused heavily on acquiring in-depth domain expertise and knowledge of healthcare industry .

PR9.NET May 29, 2006 - Pune, India -- e-Zest Solutions Pvt. Ltd., an offshore software development outsourcing company based in Pune India, has announced a booming 500 % increase during financial year 2006-2007 over previous FY in the revenue specifically from the healthcare vertical since setting up a dedicated set up Healthcare Practice in 2005 to provide expert software Solutions for Healthcare industry and Healthcare Software vendors.

"Ongoing cost pressures, increasing consumerism, frequently changing regulations, mandated new and complex technologies in the Healthcare industry always need an IT partner with high quality, domain focused with deep consulting, technology and outsourcing capabilities. e-Zest is one of the few Indian software companies to have successfully executed healthcare projects and product development ranging from Hospital information systems (HIS), Practice management systems, Patient Information Management and HIPAA implementation services for providers, claims adjudication and member enrollment applications for payers, process automation and various regulations compliant solutions." Said CEO Devendra Deshmukh.

Amol Pande COO stated:" e-Zest team understanding for the domain essentials, the in-depth study and knowledge of healthcare industry are the major strengths for Healthcare Practices at e-Zest. Moreover its linkage to the key technology platforms, project management excellence is what assists the e-Zest's team to develop software specifically for healthcare industry needs. Our robust Knowledge Acquisition frameworks are built using our deep domain and IT expertise in healthcare enabling accelerated ROI and application maintenance schedule so our customers get immediate and long term cost benefits. "

According to Ashish Gupta CTO "e-Zest has come up with new and innovative solutions to the market which helps to automate the business processes of healthcare stakeholders. We developed applications working as per the H7 and HIPPA compliances maintaining the functional aspects; moreover technically challenging applications which manage information pertaining to the patients associated to different divisions of home health agencies."

e-Zest has leveraged its experience of working with leading Healthcare firms to identify common industry pain areas and built solution accelerators, which provide a proven, state-of-the-art framework for accelerated solution delivery. This experience, combined with e-Zest capability to provide end-to-end solutions, ensures that e-Zest Healthcare clients start with an advantage.
