JobQueen.com expanded its activities to Europe with a unique affiliate program

PR9.NET June 04, 2006 - Chicago, IL - JobQueen.com expanded its activities to Europe with a unique affiliate program. The first positive results are already showing. JobQueen.com selects the most effective affiliates and offers them permanent positions as representatives in selected areas or even countries, with flat and commission type pay.

They are already reporting several requirements for translation of the JobQueen.com and started with affiliate programs in Argentina, Brazil, Egypt, China, India and South Africa. Dan Kelley, CEO couldn't hide his satisfaction: "We are offering exactly what people need, we pay our staff and coworkers good and we are very affordable to our Customers. Even companies with very small budgets can afford us and this brings way more customers than "Big Companies can afford". In Europe we selected Mid Europe to start and few 'til now most promising Affiliates for representatives. We still wait for them to qualify within the system and working habits."

First representation was opened in a small European country Slovenia, now JobQueen.com is spreading to Croatia, Serbia, Romania, Bulgaria and of course to Western Europe. Smaller problem are different languages in Europe.

We asked Manager of foreign affairs, Janet Hayes what are her views on fast development in foreign Markets and she was more than pleased to answer: "The system at the web page is planned well, we are selecting best staff from Affiliate circles, our system has something to offer everyone who wants to put at least some effort into it with solid permanent income. The best part is, our system is able to incorporate into almost anyone's goals and possibilities. Let me put it to you shorter, anyone can do it: housewives, hairdressers, waitresses, managers, and students. The system is controlled so that everyone who works hard gets their fair share, even those who just refer people or companies get a very fair share."

In June JobQueen.com plans to select representatives from Affiliate circles in already open Markets. They seems to be very excited about China, India, Brazil and Egypt.
