PTS Data Center Solutions today announced the addition of a blog to the company website

PR9.NET May 23, 2006 - Franklin Lakes, NJ - PTS Data Center Solutions today announced the addition of a blog to the company website. The data center solution provider's new blog is available on the Internet via a link in PTS' Data Center Educational Resources and Information section (<http://www.ptsdcs.com/>).

"We're thrilled to announce our new blog," said Peter Sacco, President of PTS Data Center Solutions. "Our blog is dedicated to an open exchange of ideas relating to the design of data centers and computer rooms. We hope our clients and other IT professionals will not only benefit from reading our suggestions for solutions to common data center issues, but will also take the time to comment on each post. This exchange of information is enlightening for everyone involved."

Current posts include a discussion of the relevancy of raised floors and an explanation of the importance of data center planning. To read more in PTS Data Center Solutions' blog, go to: <http://datacenterdesign.blogspot.com/>.

Other new resources available on PTS' site include:

- An overview of our state-of-the-art data center solutions and products.
- Tips from the pros at PTS on server room design.
- Basic strategies to help build a continuously available network room.
- An explanation of the features and benefits of raised server room floors.
- Detailed information on the importance of computer room fire protection.

Also of interest is information on PTS' data center consolidation and co-location services, cooling solutions designed for a variety of IT environments, Network-Critical Physical Infrastructure (NCPI) designs that achieve business flexibility, and much more.

Highly respected in the data center design industry, PTS Data Center Solutions sets the standard for continuous availability solutions for facilities to data centers to desktop systems. From our corporate headquarters in Franklin Lakes, New Jersey, and our office in Orange County, California, PTS works to fulfill our mission of creating satisfied customers by emphasizing pre-design and planning services to provide the optimal data center solutions to meet our clients' needs and resulting in an early & accurate alignment between scope, schedule and budget.

###

About PTS Data Center Solutions

Founded in 1998, PTS Data Center Solutions is a data center design firm and turnkey solutions provider, offering a broad range of project experience, specializing in designing data centers, computer rooms and technical spaces that integrate 'best-of-breed', critical infrastructure technologies and result in continuously available, scalable, redundant, fault-tolerant, manageable and maintainable mission critical environments.
