IncomeHarvest announces a Social Networking Service that promotes entrepreneurial collaboration and helps everyone achieve their personal goals and attain their business milestones.

PR9.NET July 02, 2006 - San Diego, CA - IncomeHarvest announces a Social Networking Service (SNS) that promotes entrepreneurial collaboration. Its members are finding that the service is vital because each new networking node is a connection that can have significant business-building potential. Being able to exchange ideas with mentors and like-minded individuals (or organizations) helps everyone achieve their personal goals and attain their business milestones.

IncomeHarvest introduces Coil and Coil_sparc (a pair of Java applications developed by Cyprus-based Kanosis Ltd) that allows friends, business partners, or even casual associates to manage their personal and entrepreneurial interactions by creating groups based on either the kind of relationship or the type of work to be accomplished.

Lee Matthews, President of IncomeHarvest stated: "Entrepreneurs and home business professionals are now achieving previously unattained levels of success due to being able to interact directly with experts and mentors using Coil and Coil_sparc."

With Coil's 2 GB encrypted and compressed storage space, files can be accessed quickly and reliably from anywhere in the world. Files are instantly available, no matter their format or file type, and the data stored is protected by both U.S. and international law.

The Kanosis Social Networking Service includes a collaborative toolset, a member forum, individual web sites and blogs - this promotes an entrepreneur-friendly environment and generates strong peer relationships. The collaborative and administrative toolset makes it easy to access information and communicate globally in a secure environment.

In June 2006, comScore Media Metrix reported that the social networking phenomenon continued its stratospheric ascent. Peter Daboll, president and CEO of comScore Media Metrix, stated: "Social networking is not expected to wane in the near future. This is a phenomenon we're seeing not only in the U.S., but also around the world."

IncomeHarvest is marketing this Software-as-a-Service [SaaS] using Relationship Marketing. Kanosians who promote this Social Networking Service receive a referral fee - 70% of the \$22 monthly subscription fee is returned to those who introduce the service to the marketplace. Viral Marketing with a bonus!

Unique Software - Unique Opportunity - Where Technology Meets a True Income Opportunity!
