IncomeHarvest announces a risk free online toolset that enhances collaboration and provides a way for global workgroups to access and share digital content over the Internet using any Web browser.

PR9.NET July 10, 2006 - San Diego, CA - File sharing is as popular as ever. But sharing huge video, photo or audio files does not have to be problematic. IncomeHarvest announces a solution that is easy to use, foolproof and secure - a risk free online toolset that enhances collaboration and provides an elegant, flexible way for global workgroups to remotely access and share digital content over the Internet using any Web browser.

Coil and Coil_sparc, two Java-based applications developed by Cyprus-based Kanosis Ltd, allows users to create an online relationship through which they can securely and easily upload any type of file. In addition, task management and calendaring capabilities are available.

Instant Messaging and unlimited bandwidth file exchange are key elements of the Coil system - friends, business partners or even casual associates can manage their interactions by creating groups based on either the kind of relationship or the type of work to be accomplished.

With Coil's 2 GB encrypted and compressed storage space, files can be accessed quickly and reliably from anywhere in the world. Files are instantly available, no matter their format or file type, and the data stored is protected by both U.S. and international law. Any changes to folders and files are synchronized automatically. Remote users cannot directly access information on other PCs and all data is encrypted in transit - a solution that is far more secure than conventional P2P networks.

The Java based software includes the Coil toolset, a member forum, individual and business web spaces, a 4 page web site and a blog - an entrepreneur-friendly environment that encourages strong peer relationships. The collaborative and administrative toolset makes it easy to access information and communicate globally.

Lee Matthews, President of IncomeHarvest stated: "Everyone can now share large files securely. Coil is very easy to use and, thanks to referral marketing, its users can use the service as a profit center."

IncomeHarvest is marketing this Software-as-a-Service [SaaS] using Relationship Marketing. Those who promote this collaborative file sharing suite receive a referral fee - 70% of the \$22 monthly subscription fee is returned to those who introduce the service to the marketplace. Viral Marketing with a bonus!

Unique Software - Unique Opportunity - Where Technology Meets a True Income Opportunity!
