Championed Lead Software Designer Bill Williams working with QC Software Warehouse Control Systems

PR9.NET July 24, 2006 - Cincinnati, OH - Bill Williams is QC Software's lead software designer and programmer. He has over 15 years experience designing and developing software for material handling systems. He is an experienced Linux and UNIX system administrator as well as an accomplished C, Java, and SQL database developer.

Bill's primary duties include the design and development of QC Software's base software applications and libraries, in addition to serving as system administrator and software archive controller. For project related activities, Bill manages the software development team and takes an active roll in the over-all software development.

QC Software is the leading provider of Tier 1 warehouse control systems to the warehousing and distribution industries. Since 1996, QC Software, utilizing state of the art technology combined with extensive research, development, and rigorous testing, has developed the QC Enterprise suite of products. Designed to be modular in nature, easily configurable, and platform independent, this highly scalable solution satisfies the needs of any size warehouse.

The solutions provided by QC Software (www.qcsoftware.com) enables companies to streamline their warehouse operations with the lowest total cost of ownership in the industry ensuring increased corporate profitability. With a commitment to total customer satisfaction QC Software is the obvious choice for warehouse control, order management, and inventory management needs.
