*Developed from a very simple MP3 player, Music Morpher from Audio4fun (aka Avnex Ltd.) is now advanced to the Gold edition, which features a versatile music editor popular not only among music fans but also among audio clip producers. Detailed information can be found at <http://mp3-player.audio4fun.com/mp3-music-editor.htm>.*

PR9.NET July 19, 2006 - Nicosia, Cyprus - Developed from a very simple MP3 player, Music Morpher from Audio4fun (aka Avnex Ltd.) is now advanced to the Gold edition, which features a versatile music editor popular not only among music fans but also among audio clip producers. Detailed information can be found at <http://mp3-player.audio4fun.com/mp3-music-editor.htm>.

Standing out with an advanced audio recorder, voice modifier, effect mixer and multi-track music editor, AV Music Morpher Gold can absolutely soothe the huge demand for audio clip production. Widely used in audio commercials, presentations, introductions, animated guidelines and tutorials, movies, cartoons, etc., audio clips are required to be small in file size yet unique and fascinating enough to impress viewers.

The built-in recorder is capable to capture voice from microphone, music from cassette tapes, movie soundtrack or online sounds for your audio clip. Then the Voice Morpher is right at hand for you to change one single voice file into several clips of different voices to match different characters of self-created movies and animations or make your works more interesting and enjoyable. Especially, the combination of the effect mixer and multi-track music editor enables you to modify and improve the audio clip in your own way. Mixing voice into the rhythm of the rain or any sound of nature, creating a cozy, cheerful or even creepy ambience, speeding up or slowing down the tempo, jazzing up the music with exciting beat drums, enhancing the audio quality with more bass or reverberation are only a few among an unlimited range of creative ways to customize a fantastic audio clip. Also, AV Music Morpher Gold 3.0 offers numerous audio codecs and compression rates for users to assure the most suitable file size of their work.

"Our recent marketing research shows that Music Morpher is used for different purposes, in which audio clip production makes a considerable number," said Helen Le—Audio4fun Sales and Marketing Manager. "So our product proves to be a powerful audio studio that can bring out various practical benefits satisfying all customers' needs, either as fun as entertainment or as serious as business and education."
