Mi-Co Signs VAR Agreement with AgTerra Technologies for agriculture information solution development

PR9.NET July 29, 2006 - Research Triangle Park NC and Sheridan, WY. AgTerra Technologies, Inc., an agriculture information systems development company, is now an authorized developer and value added reseller for Mi-Co. Mi-Co is a leading mobile data capture company based in Research Triangle Park, North Carolina.

"We are excited about the Mi-Co partnership," said Alan Telck, president of AgTerra Technologies, Inc. "The company has developed exciting digital pen and paper and mobile computing applications that help our agricultural clients reduce redundant data entry and work more efficiently in the field."

"AgTerra is an extremely important partnership for Mi-Co because it is our first relationship focused on the agriculture and natural resources solutions," stated Carolee Nail, Mi-Co vice president of operations 'and we are pleased we have signed a partner with such a long and successful track record with agribusiness customers."

Software applications developed by AgTerra and using Mi-Co technology are currently being used for crop scouting and livestock tracking. The technology provides users with the ability to interpret handwriting and collect signatures and images that are easily incorporated into professional looking reports. Many of the reports are conveniently delivered online to producers and agricultural managers throughout the United States.

AgTerra's current customer base includes a large segment of the United States and Canadian sugar industries, vegetable seed companies, state livestock boards and ranch entities with over with over 1,000,000 acres of combined pasture and farmland. Mi-Co's current customers represent a variety of industries and governmental services and include the United States Department of Agriculture which currently uses Mi-Forms technology for mobile data capture for monitoring and reducing the spread of disease among livestock.

###

About AgTerra
