Financial Report Writer Added to Technology Group International ERP Software Suite

PR9.NET August 03, 2006 - Toledo, OH - Technology Group International (TGI), a leading ERP software solution provider, announced the release of an easy to use financial report writer that is fully integrated into TGI's flagship software product, Enterprise 21.

The new report writer automatically exports data from Enterprise 21's General Ledger module into commonly used spreadsheet programs such as Microsoft Excel. This export process gives the average user the ability to quickly produce financial data in a presentation format that is easily customized to mimic their organization's unique look and feel.

Scott Smith, President of Technology Group International, noted, "The report writer allows both existing and new Enterprise 21 customers to produce sophisticated financial reports with very minimal effort or data set up. It is designed to fully capture the advanced general ledger and financial reporting structure inherent in our ERP software."

Sample financial reports include:

- Balance Sheets
- Income Statements
- Profit and Loss Statements
- Financial Ratios
- Cash Flows

The financial report writer accommodates organizations with multiple departments, cost centers, divisions, or companies. It is available with all new sales of the Enterprise 21 ERP system.
