*Enterprise Application Development, Document Collaboration and Business solutions agility via web services on the Microsoft SharePoint 2007 platform.*

PR9.NET August 08, 2006 - Portland, Oregon: Encodex Technologies, A Microsoft Gold Certified Partner is a Global Software Development and Information Technology outsourcing company, providing offshore outsourcing solutions to enterprises worldwide.

Encodex technologies team members are constantly upgrading their technology platform. With the release of Office SharePoint Designer 2007, Encodex can deliver compelling and highly integrated SharePoint web portals and deliver workflow-enabled applications and reporting tools on the SharePoint 2007 platform..

"With the availability of the next generation of Microsoft SharePoint and Office Technologies we will develop more applications to manage business processes and the work of dispersed teams. These Knowledge Management Applications build on SharePoint Portal 2007 can store extensive information that is needed to generate reports in a variety of flexible ways. We ensure that all our customers will be benefited by adapting to this technology."

Arun Joshi, CEO, Encodex Technologies India.

Encodex, because of its GOLD Partner Status, got early access to the beta version of SharePoint 2007 and Microsoft Office Enterprise 2007.

"We enjoyed a new level of support for creating and customizing next-generation SharePoint Web sites and technologies. Microsoft Office SharePoint Designer 2007 has deep editing support for the technologies underlying Microsoft Windows SharePoint Services technology, such as ASP.NET 2.0, cascading style sheets, and Microsoft Windows Workflow Foundation.

Office SharePoint Designer 2007 supports creating and editing ASP.NET pages. It provides the same level of support as Microsoft Visual Studio 2005 for ASP.NET such as control hosting, property editing, toolbox, and Microsoft IntelliSense technology in Code View. This is certainly going to be the most important tool in our future development."

Prashant Pawar, Director of Engineering, Encodex Technologies India.
