PR9.NET August 12, 2006 - Nicosia, Cyprus- Audio4fun has just finished their project of updating DVD Player-Morpher Gold with a more advanced title and subtitle editing function. This benefit information can be found at: <http://dvd-player.audio4fun.com/dvd-player-gold-features.htm>.

Users worldwide find this AV DVD Player-Morpher Gold one of the cleverest solutions for their home movie entertainment. You may manipulate this software with a wide range of interesting tasks such as playing and converting DVDs, applying audio effects to change the actor and actress voices, capturing your favorite image or audio, designing stylish DVD covers, etc.

The result from some quick interviews with movie fans shows that a lot of non-English speaking people want to improve the subtitle or compose it in their native language so that their old parents can enjoy their favorite films at home easily. Understanding their customers' expectation, Audio4fun Lab Team has updated the Title and Subtitle editing function of DVD Player-Morpher Gold.

This new feature is introduced in the list of video effects. You can begin by simply clicking on "Text" and choosing "3D Subtitle Editor." Estimate the duration that you want the subtitle to appear, then compose and apply your own words into the film. DVD Player-Morpher Gold allows you to further personalize the subtitle by adjusting its font, size and color among an unlimited range of combinations, which will not give you any moment of boredom. Moreover, the 3D Parameters enable you place your subtitle at any favorite position on the screen and rotate it to any direction as you wish.

"We would like to offer our customers as many ways to enjoy their movies as possible," said Terry Jin—Audio4fun Lab Manager. "As promised, our developing team will try to make your home cinema the most fabulous and enjoyable space for all family."
